A wild card can smell and develop code despite any programming language with over 4 years of industrial experience, extremely focused, a good team player and fast learner.

- Proficiency in .Net (C#, VB, ASP, MVC, MVVM, WCF, Web Forms, Xamarin, WPF and REST API), PowerShell, DevOps, YAML, Docker, CI\CD, ARM templates, Azure, Active Directory and LDAP.
- Strong knowledge in React Typescript, C, C++, Arduino, PHP, SQL, XML, CSS, JavaScript, Angular and java.
- Advance knowledge in JMeter, Debugging, analysing crash dumps, reverse engineering, Software tampering, website mirroring, SQL injections, packet sniffing, IP poisoning and other related techniques.
- Familiar with programming languages like python, NOSQL and R.
- Hands on experience on UI\UX and tools such as Figma, Google web designer and Just in time.
- SOLID understanding of Software Design and Architectural patterns.

Assoc. Software developer, One Identity (DELL R&D). Bangalore, Karnataka. **Sep. 2017 – Nov. 2019**

Was working with a product called Active roles which is one among the leading **IAM** products in the industry it was based on Active directory and Azure AD. this product was built using **C++, C# (console, WPF, Web, Restful API, MVC, MVVM and PowerShell)**, played a key role in migrating the on-premises AD solutions to Azure AD.

Software developer, vela technologies. Bangalore, Karnataka. **Nov. 2019 – May 2019**

Automated, redesigned, developed and migrated multiple applications from on-premises to PaaS using Azure, gained strong knowledge on **CI\CD, YAML, PowerShell, Azure DevOps, Docker, Azure resources etc.** Where all the automation was done using PowerShell and the controlling website was done using **C#, angular, entity framework, Rest API, React JS and MSSQL.**

Senior Software developer, vela technologies. Bangalore, Karnataka. **May 2019 – Present**

- Leading the CloudOps team , On top of Azure automation performance tests were configured using Jmeter and configured **JtlReporter** (Open source application to generate reports from JMeter) using Azure containers and also ended up contributing to JtlReporter.
- Migrated from Madcap Flare and Configured **DocFX**.
- Contributing towards the product where I am working on multiple components around C#, React, MVC, MVVM, Rest API and Xamarin.

BE | Information Science and engineering | 2017 | Sri Jayachamarajendra college of engineering (SJCE) Mysore | First class with distinction.

Projects & Accomplishments (Apart from professional exp)

- **Touchless 3D interface:** used Arduino UNO and few other h\w components and created a touchless mouse which can be connected to a drow or to a computer as a 3D mouse. Had created a small game suing JAVA and handled the mouse(hand) position using embedded C.
- **Find a Home for PK:** a hackathon task, created a property search application using android (JAVA) where it used to fetch the properties posted in various platforms over the internet and sort based on the user's preference. Had used most of the available API's from google search.
- **Gattimela Matrimony:** Worked as a developer, architect and lead a team of 5. the application was built using C# .Net Core Rest API with OAuth Logins and Entity Framework for a matrimonial website.
